The fundamentals of Front-end Development

Are you interested in learning front-end development from scratch? Our 4 in 1 program is designed to take you from zero experience to an intermediate Front-end Developer.

Through the digital program you will be guided through the essential Front-end languages HTML, CSS, BOOTSTRAP and JavaScript in great detail. You'll learn how to create

dynamic and responsive websites and web applications that engage users and deliver a great user experience.

In this program you'll gain the practical skills and knowledge needed to build websites that are not only visually stunning but also highly functional and user-friendly.

You will learn:

- How to use the latest HTML 5 standard HTML to format text, create hyperlinks, tables, lists, forms, display images and more.
- How to use CSS to change the appearance and layout of all the pages in a Web site.
- How to use JavaScript to improve the design, validate forms, detect browsers, create cookies, and much more
- How to use Bootstrap to improve the design, create web sites which automatically adjust themselves to look good on all devices, from small phones to large desktops.
